

Stuart Shrubbs, Gary Whittaker, Mick Bailey and Gary Ryan

Meet the BP Installations team

Since 1st September 2016, BP Installations have been the principal contractor working on West Pier. Airport Life went onsite to meet the team...

Gary Whittaker, BP Installations project director is responsible for the overall delivery of the West Pier project and works closely with the LCY project team and LCY directors. He's passionate about the day to day running of the project, telling us "there is never a day that goes by without challenging decisions having to be made so that the project progresses in accordance with the demanding construction programme".

Gary has a strong and enthusiastic team working with him both in the office and on-site, they are Melanie Watkins - Williams, document controller, Stuart Shrubbs, electrical project manager responsible for overseeing the installation of all power, lighting and services to West Pier along with associated IT Rooms, Gary Ryan, mechanical project manager looking after the installation of heating and cooling to the terminal along with the hot and cold water services required for the new concessions and toilet facilities.

Mick Bailey, BPI construction project manager is responsible for the construction delivery along with Gary, telling us a little about his role he said, "I ensure site health and safety is kept to the highest standard and make sure BPI have a focus on delivering

high quality finishes in order to get the wow factor from LCY staff and passengers".

Here's what the first gate to open looks like, much more to follow!
